

Dashboards

Instant Visual Management of your Business

Dashboards unlock and display the valuable information that lies at the heart of your Attaché PRO accounting system. They show you the most critical business information in an easy-to-read format, and give you the ability to be more proactive in the running of your business and stay a step ahead.

Key benefits

- Monitor the key performance indicators of your business for better business management.
- Instantly see information across different areas of the business.
- Focus on one area of the business and see all relevant information in one screen.
- Live information can be updated to the dashboards as processing continues.
- Information displayed is interactive and can be drilled into so you can view the source document, or masterfile.
- Data can be filtered or sorted to see just what you need.
- You can use the dashboards to identify trends in your data.
- Spot the potential problems and take proactive measures to resolve them.
- Information can be role-based or personalized per user.
- Standard gadgets are available for all major modules, but can be customized to suit your requirements.
- Format and layout of gadgets can be modified to suit, e.g. number of columns, or data format.
- Manage to do lists and reminders.
- Advanced search capabilities allow you to search multiple fields for your search criteria at once.
- Information can be displayed in a variety of formats, including charts, calendars, or list view style.

Visual Management

Management can get a snapshot of the health and performance of the business by looking at the home page displaying the key performance indicators across various areas of the business. More information on those areas can be ascertained by looking at individual modules or drilling down for more detail.

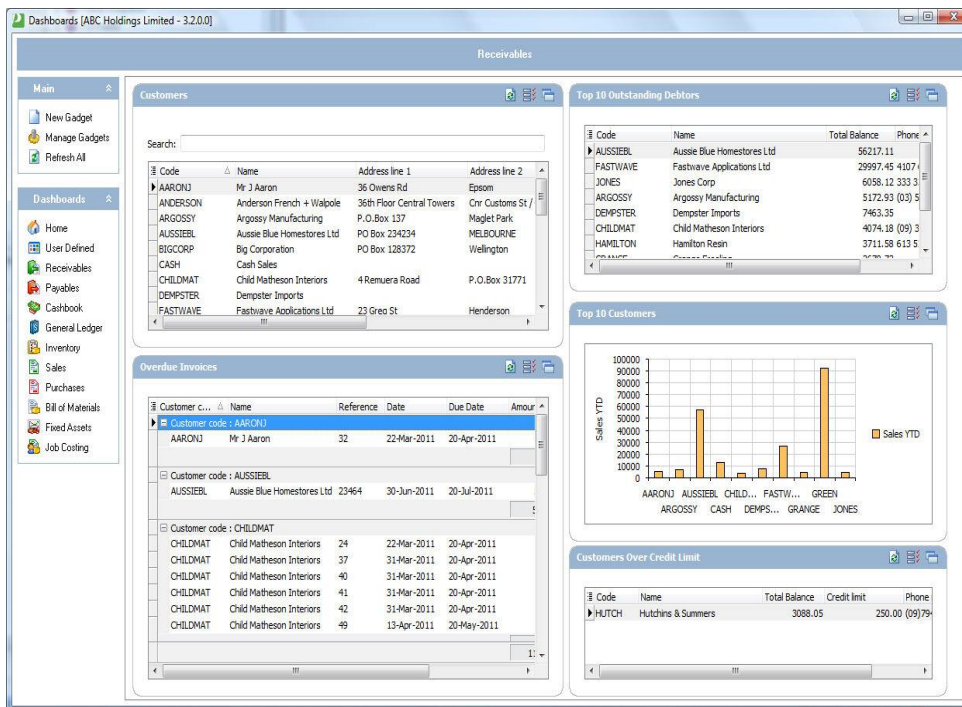

Key staff can view the information that is critical to success in their role to enable them to make better and faster decisions, identify trends or highlight any areas of concern which need to be resolved.

Interactive

When viewing your business information on the dashboards you are able to be interactive with the information, unlike traditional reports. The gadgets which make up the dashboard are able to be sorted or filtered and the layout can be viewed as a chart, calendar, or list. Once you have found the data you are looking for you are able to drill down to the source documents or masterfiles – this gives you the ability to take the relevant actions immediately.

Customisable and personalised for each user

Each user has the ability to choose which gadgets display on their dashboard. The gadgets can be rearranged on the page, and the layouts can be changed (chart, calendar, or list). Within the gadgets you can add or remove columns, sort and filter the data. It is also possible to edit the gadgets to be fully customised to show you information that is relevant to your business or just to this user.
