

Foreign Currency

Whether you are an exporter or importer the Attaché PRO Foreign Currency module is designed to take the work and complication out of your foreign exchange management. With this comprehensive module you can raise sales invoices, customer statements, purchase orders or remittance advices in the currency of your choice. Receipts and payments can be in the same foreign currency or your local currency. You can even manage multiple foreign currency bank accounts.

[Amend Foreign currencies screen](#)

Centralised Currency Management

With the Attaché PRO Foreign Currency module you can control who has rights to amend the centralised currency table. This is a 'set it and go' system where a central administrator defines the currencies and transactions entered elsewhere in Attaché PRO will use the appropriate exchange rate based on the transaction date. This system is simply yet powerful because ultimately, you can still overwrite the exchange on individual transactions if they need to be processed at a different rate.

View it your way

Appropriate Attaché PRO screens have a Foreign Currency toggle button that allows you to switch between viewing the transaction / balances in the foreign currency or the local equivalent.

Automated Exchange Variations

Attaché PRO saves you time and work by automatically managing exchange variations as you process your documents in the normal way, this means you can concentrate on processing your sales and orders and let Attaché PRO look after the details.

Cashbook Bank Accounts [ABC Holdings Limited - Demonstration Only]

Code: USD Description: US Dollar Account Reference: 123
