

# Newlands Group Ltd

“As a user of Attaché Pro and Attaché Payroll systems, we have found both programs to be powerful yet relatively simple as well as easy to use. This helps with the training of new staff, particularly those who have had little experience with computers or the use of accounting systems.

We find that the screens are clear, easy to follow and reporting functions include strong components that provide relevant data easily.

Compared with our previous experience of payroll software, Attaché is quick and efficient to use, thus saving processing time and money. The program is a better option for businesses of our size than a manual system or using a payroll bureau.

The support from Attaché Software Centre Christchurch, along with the minimal cost, versatility, regular upgrades and reliability of the software package would lead me to recommend Attaché Software to any business.

Having your own in-house accounting and payroll system is now more affordable than ever.”
