

IMPORTER / SUPPLIER

Ski Industries

“We have been running our company on Prophet for over 20 years now and we have always found the system to be very reliable.

Our organisation carries many thousands of spare parts which need to be managed in a controlled manner; Prophet makes it possible to easily integrate ordering these parts from offshore, via stock control to final customer invoice.

The system will generate many standard reports, but we have also developed many customised reporting options with the assistance of our support company in Christchurch. This greatly contributes to the successful operation of our company.

Support is only a phone call away and the support consultants at Palmside always respond in a timely and helpful manner.”
